Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of a certified copy of the German application in an application data sheet. If this copy is being filed to obtain the benefits of the foreign filing date under 35 U.S.C. 119(a)-(d), applicant should also file a claim for such priority as required by 35 U.S.C. 119(b). If the application being examined is an original application filed under 35 U.S.C. 111(a) (other than a design application) on or after November 29, 2000, or an application in which applicant has requested voluntary publication, the claim for priority must be presented during the pendency of the application, and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior foreign application. See 37 CFR 1.55(a)(1)(i).

If the application being examined has entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the claim for priority must be made during the pendency of the application and within the time limit set forth in the PCT and Regulations of the PCT. See 37 CFR 1.55(a)(1)(ii).

Any claim for priority under 35 U.S.C. 119(a)-(d) or (f) or 365(a) or (b) not presented within the time period set forth in 37 CFR 1.55(a)(1) is considered to have been waived. If a claim for foreign priority is presented after the time period set forth in 37 CFR 1.55(a)(1), the claim may be accepted if the claim properly identifies the prior foreign application and is accompanied by a grantable petition to accept an unintentionally delayed claim for priority. See 37 CFR 1.55(c).

Clarification of whether applicant is claiming priority under 35 U.S.C. 119(a)-(d) or 35 U.S.C. 371 or whether no priority is being claimed is requested.

Oath/Declaration

2. No post office address has been designated anywhere in the application papers. However, applicant's residence, as given in the oath or declaration, includes a full street address. The given address will be presumed to be applicant's post office address. If the above is incorrect, applicant should submit a statement as to post office address in response to this Office action.
3. The declaration does not identify the foreign application for patent or inventor's certificate on which priority may be claimed pursuant to 37 CFR 1.55.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the springs between the rotary adjustment parts in claim 1 and 2, in addition to the rotary adjustment part with an edge in claim 2, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
5. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Title

6. The title of the invention is not descriptive. The words "three elements" renders the title vague and not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Abstract

7. The abstract of the disclosure is objected to because of the following reasons:

The abstract is more than one paragraph.

The first paragraph in line 3 does not end in a sentence.

The word "that" is repeated twice in line 15 rendering the sentence unclear.

Correction is required. See MPEP § 608.01(b).

Specification

8. A substitute specification including the claims is required pursuant to 37 CFR 1.125(a) because the current specification contains three separate and distinct disclosures, each having a separate brief descriptions of drawings and detailed description of drawings.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Objections

9. Claims 1 and 2 are objected to because of the following informalities:

The claims are vague as to where the preamble ends and where the body starts.

Claim 1 refers to reference number 13 and 14 in figure 1 to indicate the spring device, however reference number 13 and 14 represent needles as disclosed in the specification. Claim 2

Art Unit: 3751

refers to an edge as reference number 17, when reference number 17 is referred to as the suture magazine in the specification. Finally, claim 2 refers to reference number 18 and 19 as springs, when they are described as pushers in the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

10. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

11. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claims 1 and 2 have numerous vague and indefinite languages that renders the claim indefinite. Examples of the indefinite and vague language are “or at least for reducing the size of” in lines 1 and 2, “in particular” in line 13, and “in the vicinity of” in line 14 for both claims 1 and 2. Appropriate revision is required to conform the claims with current U.S. practice, avoiding idiomatic errors.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoon, Scirica et al, Zlock et al, Hughes, Andreas et al, and Hasson are cited as general rotatable suture devices.

Art Unit: 3751

13. Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

14. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in a clear and descriptive form.
